

ABT-20M

SINGLE BEAM ACTIVE INFRARED PHOTOELECTRIC DETECTOR

GSK

Specifications	
Alert distance	≤20m
Response speed	50msec
Infrared frequency	1.92khz
Wave length	940nm
Power supply	DC10.5 - 24V / 40mA max
Relay output	Max 30V / 1A
Temperature & Humidity	Temperature:-25°C ~ +55°C ; Humidity: RH.95%
Infrared angle	<±10°
Size	48mm x 75mm x 30mm

OTHER INFORMATIONS

- Adopt aspheric surface lens, optical gathered, powerful, concentric.
- Light resistance reaches 50.00lux, built-in automatic adjustment light filtering system. avoid the influence from strong light or car light.
- Unique Optical Design: The photoelectric beams have the ability to penetrate compound glass.
- When meet the bad weather and fog, the detector will enhance sensitivity automatically to distinguish circuit.
- Special structure design make it work in the bad environment properly
- Use C model circuit failure output.
